## DETAILED ACTION

### *Election/Restrictions*

1. Applicants' election with traverse of Group I, claims 1-70, in a response dated 7/8/2003 is acknowledged. The traversal is on the ground(s) that "the subject matter are interrelated such that a search of the surface mount electronic device comprising a semi-solid thermoplastic adhesive of one of these Groups would require a search of the classes and subclasses of the others" (Response, page 2, second paragraph). This is not found persuasive because the inventions are distinct, as set forth in Paper No. 5.

The requirement is still deemed proper and is therefore made FINAL.

2. Applicants' are reminded that in section 9 of Paper No. 5, there is also a requirement for election of the following species, and the <sup>ir</sup>election of species is absent from the response dated 7/8/2003:

Species A: Polyolefin-based thermoplastic adhesive, for claims 23-38.

Species B: Polyamide-based thermoplastic adhesive, for claims 39-51.

Species C: A blend of polyolefin-based and polyamide-based thermoplastic adhesive, for claims 52-61.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, thermoplastic adhesive is generic, which includes claims 1-22 and 62-70.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
